

Part VI

Web page design experiment

Aim

- Look at the four Olympic bid webpages designed by our students
- Do they follow/meet design criteria checklist?
- Strengths and weaknesses
- Focus on design, not content or quality of online translation
- Give feedback

Method

- Split into four groups
- Each group concentrate on one website, but be sure to look at (at least one of the) others
- Websites are wholly contained on CD
 - Olympic_webpage_experiment/**X**/ ($X \in \{A,B,C,D\}$)
 - Start with Home page **X**.html
- But you need web connection to generate translations
